

MODULE 8 ORGANIZER SCRIPT

Welcome to the module eight organizer.

Let me begin this organizer by saying:

Congratulations! You have persevered through this course. You have reason to be proud of yourself.

This module is dedicated to synthesizing the knowledge you have gained in this course. You will reflect in your blog on best practices for distance education ISD and complete your final ISD project. You will put your ISD project in your e-portfolio to demonstrate your mastery and understanding of the ISD process. Remember that the e-portfolio is the culminating project for your program where you demonstrate the knowledge and skills gained throughout the program. It is hoped that it will also serve as a tool for your career advancement. Throughout each Educational technology course, you are adding to your e-portfolio. The final product will be submitted in EDUC 639.

Finally, please remember to complete the Educational Technology Program Survey that helps to contribute to the enhancement of the courses and programs.

After you are done listening to the module organizer, take time to read our objectives for this module. I also encourage you to take some time to write your personal objectives.

Also, download the "To Do" list and begin planning your week.

Have a blessed week.
